Add Mixed Numbers With Like Denominators (A)

Add the whole numbers.
 Add the fractions.
 Reduce the fraction. The whole number stays the same.

$$9 \frac{3}{10} + 7 \frac{1}{10} = 16 \frac{4}{10} = 16 \frac{2}{5}$$

$$9 \frac{4}{12} + 7 \frac{4}{12} =$$

 Copyright © 2021 K5 Learning Welcome to our page Add Subtractive Fractions Worksheets. We created a random generator to make your own by adding and subtracting fraction spreadsheets. Sheets 2 to 4 have more difficult 2 digit numbers to multiply and responses that are usually greater than 1000. Our surveys were created using Google Forms.
 We divide the worksheets on this page into two sections: 2-digit multiplication x 1 digit (3th grade) 2 digits x 2 digits multiplication (4th grade) Each section ends with some more complicated challenging sheets for more capable students. There are also some examples worked out. We welcome any comments on our website or spreadsheets in the
 Facebook comment box at the bottom of each page. Using these games will help your child learn their multiplication facts to 5x5 or 10x10, and also develop their memory and strategic thinking skills. Before your child deals with adding and subtracting fractions with different denominators, they must be confident with equivalent fractions. We
 welcome your feedback, comments and questions about this website or page. page.
