Powerful and offered offeringDisplay and CamerasThe Xiaomi Redmi Note 10 features a 6.43 inches (16.33 cm) bezel-less display with a punch-hole in the Super AMOLED SGSEyeCare certified display offers a screen resolution of 1080 x 2400 pixels along with a pixel density of 409ppi. Further, the smartphone features a Corning Gorilla Glass v3 to provide sturdy protection to the screen. Xiaomi Redmi Note 10 features a Quad-camera setup with a 48MP f/1.79 Primary Camera. Supporting the Primary Camera is an 8MP f/2.2 Ultra-Wide-Angle Lens, a 2MP f/2.4 Macro Lens, and a 2MP Depth-Sensing Camera. Coming to its front fascia, the device showcases a 13MP f/2.45 Primary Camera embedded in the punch hole of the display. Performance and BatteryMonitoring the performance of the device is a Qualcomm Snapdragon 678 chipset that rests over an Octa-core (2.2GHz, Dual-core, Kryo 460) processor. Besides this, the phone gets 4GB RAM and an Adreno 612 GPU to ensure premium performance.Coming to its battery, Xiaomi Redmi Note 10 features a 5000mAh Li-Po type battery with a Fast charging facility of 33W to add to its daily functionality. Storage and ConnectivityThe smartphone gets an internal storage capacity of 64GB which is capable of further extension up to 512GB. Xiaomi Redmi Note 10 operates on the Android v11 operating system customized with MIUI. Connectivity-wise it features 4G VoLTE network compatibility along with Wi-Fi, USB Type-C charging port, Mobile Hotspot, Bluetooth v5.0, and A-GPS, GLONASS. Network Technology GSM / HSPA / LTE / 5G 2G bands GSM 850 / 900 / 1800 / 1900 - SIM 1 & SIM 2 3G bands HSDPA 850 / 900 / 1700(AWS) / 1900 / 2100 4G bands 1, 2, 3, 4, 5, 7, 8, 12, 17, 20, 28, 32, 38, 40, 41, 66 5G bands 1, 3, 7, 8, 20, 28, 38, 40, 41, 66, 77, 78 SA/NSA Speed HSPA 42./2.5.76 Mbps, LTE-A (CA), 5G Launch Announced 2021, March 04 Status Available. Read the reviews on the 4PDA or XDA Developers websites before installing any updates to Redmi Note 7 Pro. If you downloaded the flash file, installed firmware and encountered operation problems, please write about it in the comment section.Redmi Note 7 Pro is on the Xiaomi EOS list. This means that support for the smartphone has been discontinued. It does not receive software updates and new firmware, and known security vulnerabilities are not fixed.Xiaomi releases monthly and quarterly security patch updates for the Xiaomi, Redmi and POCO for 2 years after the device goes to market. Monthly and quarterly security updates include Android security patches from Google as well as fixes for specific issues from Xiaomi. Improve your Snapdragon version only, Xiaomi Redmi Note 4's battery life, performance, and look by rooting it and installing a custom ROM, kernel, and more. Reviews of the Xiaomi Redmi Note 4. See how other XDA members rate various facets of the Xiaomi Redmi Note 4 like app launch speed, video recording quality, LTE strength, speakerphone loudness, and much more. If you have the Xiaomi Redmi Note 4, contribute your own ratings and drop a comment! Xiaomi has brought a solid competitor to market in the Redmi Note 11, one that will deservedly give other budget phones a run for the money thanks to its good build, appealing screen, and strong performance.The Redmi Note 11 is one of four additions to the Xiaomi sub-brand's lineup. It serves as an entry point to the Redmi Note 11 series and may represent the best value for some buyers, but don't write it off as a low-end burner — this phone packs plenty of punch for a budget phone. Find out what makes it stand out in the Android Authority Redmi Note 11 review. Redmi Note 11 Update, April, 2022: We have updated this review with launch pricing in the UK and the rest of Europe and comparison with the Poco X4 Pro and Redmi Note 11 Pro 5G. What you need to know about the Redmi Note 11Eric Zeman / Android AuthorityRedmi Note 11 (4GB/64GB): €199 Redmi Note 11 (4GB/128GB): €199 / €229 Redmi Note 11 (6GB/128GB): €269 It would be easy to write off the Redmi Note 11. Announced alongside the Redmi Note 11 Pro 5G, Note 11 Pro, and Note 11S, the lowly Note 11 is among the simplest offerings from Redmi. Even so, it shares plenty of DNA with its pricier kin, including a large battery, biometrics, a handful of RAM and storage configurations, and the latest MIUI software from Xiaomi. In fact, the Note 11S and Note 11 are practically identical, save for a few core specs. More to the point, it makes some worthwhile improvements over the older Note 10. For example, it boosts the refresh rate of the screen and improves the resolution of the main camera.The Redmi Note 11 is, however, the only phone in the lot with a starting price of under \$200. Sliding in under that number gives the phone a psychological advantage over its peer group and keeps it competitive with formidable fare such as the Samsung Galaxy A series. Check out: The best Xiaomi phones you can buyIn addition to the three variants noted above, the Redmi Note 11 comes in three colors: Graphite Gray, Twilight Blue, and the multi-colored Star Blue. In other words, there are plenty of options to find the color and storage combination that best suits your tastes and budget.The Redmi Note 11 will be available for sale in the UK and other selected regions across Europe. Despite only publicly pricing the phone in dollars (starting at \$179), the Redmi Note 11 is not expected to launch in the US. What's good?Eric Zeman / Android AuthorityRedmi didn't stray far from its traditional design language with the Note 11. That is to say, the phone is a conservative slab that does little to stand out from the pack. The two blue colorways give the phone more visual pop than the dark gray one. Vanilla looks aside, the hardware is solid for this class of device. The frame and rear panel are made from polycarbonate, though they could be mistaken for metal and frosted glass from a distance. Our Graphite Gray unit did pick up fingerprints rather easily. Redmi opted for Gorilla Glass 3 to protect the display, which has good scratch resistance. The phone also notches an IP53 rating, meaning it is protected from light splashing.The Redmi Note 11 shares its 6.43-inch AMOLED screen with the Note 11S. Redmi claims the FHD+ display pushes out 700 nits of brightness with peaks reaching 1,000 nits, and it has DCI-P3 wide color gamut. It also boasts a 90Hz refresh rate and a 180Hz touch sampling rate. You really can't ask for much more from a sub-€200 phone. It's a clean, crisp display that's bright enough for indoor and outdoor use. Colors pop and the scrolling action is smooth when navigating through apps and the user interface.Eric Zeman / Android AuthorityThe 5,000mAh battery is one of the Note 11's best features. This potent power source pushed the phone through more than a day and a half on a consistent basis during my testing, even with the display set to 90Hz. Dropping the refresh rate to 60Hz gives you nearly two full days of battery life. It powers up quickly, too. The Note 11 ships with Android 11 and Xiaomi's MIUI 13. It's a somewhat overhearing user interface skin, though it has improved steadily over the years. If you're wondering about Android 12, Redmi has committed to getting the newest version of Android to the Redmi Note 11 family at some point during the third quarter of 2022, which isn't the most timely schedule to say the least.Beyond that, Redmi isn't giving any real long-term assurances either, with a spokesperson only stating: "The Android updates and security patches cycles of Redmi devices are in accordance with Xiaomi's agreements with Google, and will roll out and comply with corresponding policies."For some idea of what to expect, the Redmi Note 10 is expected to be updated to Android 12 in a similar timeframe, while the Redmi Note 9 has been included in MIUI 13 test builds in China, but there's no word on a global rollout yet or Android 12, specifically. We'll have to wait and see what support is provided by Redmi for the Note 11, but in the meantime, the lack of any firm long-term promise is a slight knock against the phone. This phone may be an entry-level model, but it has big aspirations and has the basics covered handsomely. The hardware is perhaps a touch simple and yet the phone is well made, offers a gorgeous display, and delivers killer battery life. The Note 11 easily keeps up with the pack thanks to its good performance.The only real caveats are the limited update promise and the middling camera setup that is just average for the price. The latter in particular is where the phone could have made a real improvement over its predecessor, the Redmi Note 10. While the Note 11 includes significant updates to the display, the camera, performance, design, and most everything else is basically the same, meaning Redmi missed an opportunity to evolve its low-cost phone. The Redmi Note 11 is a real bargain. Nevertheless, for its super-low starting price of €199 in the UK and €199 throughout the rest of Europe (the latter for the 4GB RAM version), the Redmi Note 11 is still a bargain.If you're looking for a bigger screen and even faster speeds you can look at the Note 11 Pro 5G (€319), though the Poco X4 Pro (€259) is essentially the same phone but cheaper.Prefer another make? The Samsung Galaxy A03s (\$159) is a decent option with excellent long-term software support, a similar display and battery, but less storage, a weaker processor, and no IP rating. There's also the Nokia G20 (\$199), which has a similar-sized screen but at a lower resolution, as well as a weaker chipset and no ultra-wide camera.While it may not be the generation leap some may have hoped for, Redmi has brought a very solid competitor to the entry-level market in the Note 11, one that will deservedly give other budget phones a run for their money throughout the year. Redmi Note 11Redmi Note 11The Redmi Note 11 is the entry-level model in Redmi's family of Note 11 devices. It keeps the camera, memory, and storage specs in check to achieve a lower price point, but carries over the same appealing display and generous battery life. Top Redmi Note 11 questions and answers Does the Redmi Note 11 have expandable storage?Yes, it supports microSD cards up to 1TB. Does the Redmi Note 11 have stereo speakers?Yes, it has stereo speakers. They are quite loud, but don't offer much in the way of bass. Does the Redmi Note 11 have biometrics?Yes, the phone has a fingerprint reader built into the power button on the right edge. It works well. Does the Redmi Note 11 have a headphone jack?Yes, the Note 11 has a 3.5mm headphone jack mounted on the top edge. RedmiRedmi Note 11Xiaomi Redmi
